

Twitter users activity on WeRateDogs Portal

WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. These ratings almost always have a denominator of 10. The numerators, though? Almost always greater than 10. 11/10, 12/10, 13/10, etc." WeRateDogs has over 8.9M followers (on February 2020) and has received international media coverage. The account also has a branded game, a popular online store, and a book that was published in Fall, 2017

Data Analysis & Visualization

After gathering, assessing and cleaning the Twitter data for the WeRateDogs tweeter page, I proceeded to analyse and visualize the dataset which contained 2060 tweets. I started by checking the breed that was majorly predicted.

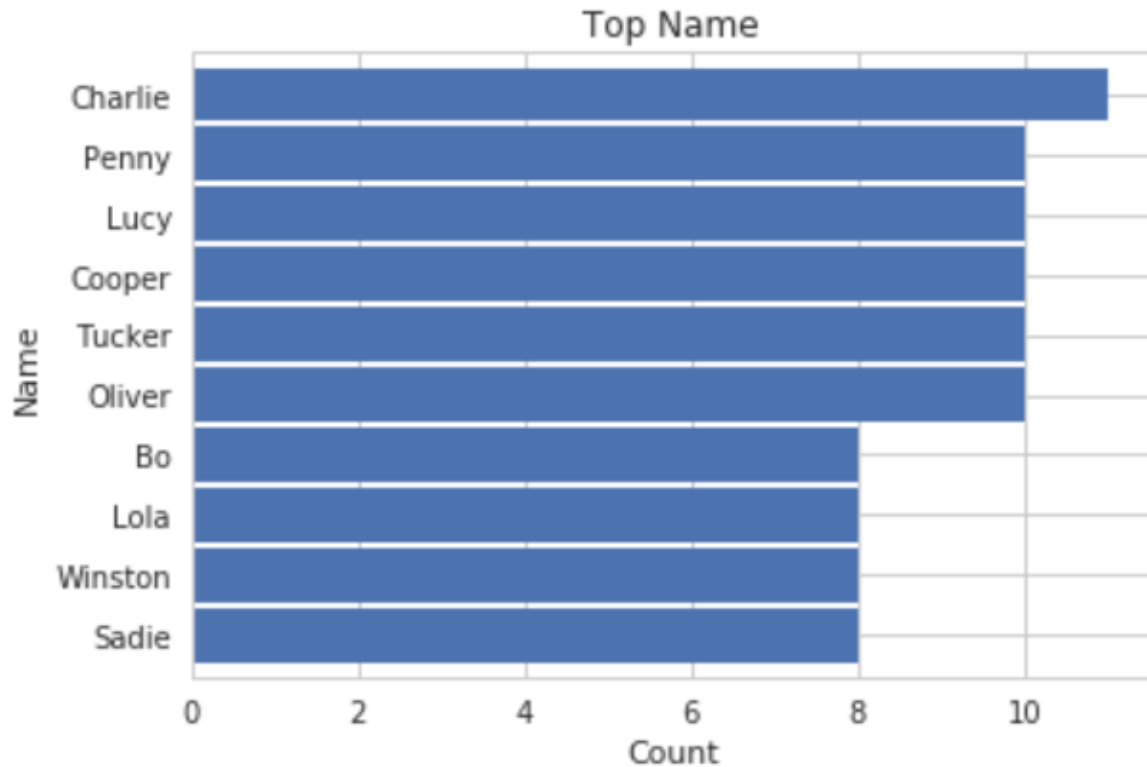

From the bar chart above, the 3 majorly predicted breeds were the Labrador Retriever, the Golden Retriever and the Chihuahua dogs

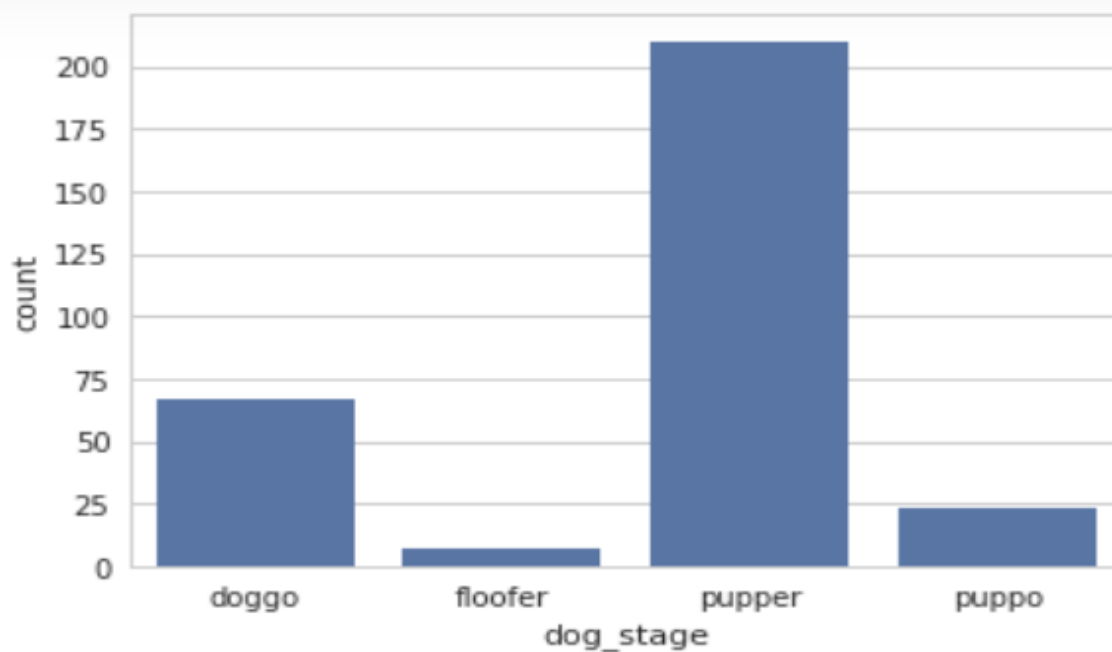

Labrador Retriever

Then I checked to see the name mostly given to dogs

From the visualization aabove it can be seen that most dogs are given Charlie(which I think should be a male dog given name) followed by penny, Lucy, Cooper, Tucker and Oliver. Most dogs name are male given name, it is likely their tweets are mostly about male dogs

I also checked to know the dog stage that was mostly tweeted by the We rate dogs tweet page,

From the above visualization, it can be seen that the we rate dog page mostly rates dogs in the pupper stage. This analysis is useful for dog owners who wish to have their dogs featured to know the chances of their request granted
